EDUCATION

Nazarbayev Intellectual School, Kokshetau — Expected 2028

PROJECTS

Veya, founder — veyaai.vercel.app

Low-cost AI eye screening system that turns a smartphone into a portable retinal camera.

- Built the prototype: phone attachment, web platform and AI model
- Trained the model on thousands of retinal images
- Conducted customer interviews; target use is screening in rural areas with few ophthalmologists

KozbenSal — github.com/ulacoder/KozbenSal

Eye-tracking glasses that let people with limited mobility draw, type and control a computer with eye movements and blinks. Costs about $50 to build. 2nd place at WRO 2026.

FMEdu — github.com/ulacoder/FM-Edu

AI learning platform for grades 7-12. 1st place and 150,000 KZT at Future Minds Hackathon 2026.

Shinobi Motion — shinobi-motion.vercel.app

Browser game controlled by hand signs through a webcam. Built at Admit Hackathon 2026.

SaqDrone

Autonomous drone that finds a drowning person, flies to them and drops a rescue device.

Mentoria Hub — mentoria-hub-hazel.vercel.app

Platform with scholarships, olympiads and summer programs, plus online courses and a Telegram bot.

AWARDS

- Future Minds Hackathon, 1st place (2026)
- WRO, 2nd place (2026)
- WRO, 3rd place (2025)
- StartUp Orda by Astana Hub

EXPERIENCE
