github.com/ulacoder · LinkedIn
Astana / Kokshetau, Kazakhstan

16-year-old student at Nazarbayev Intellectual School. Came to programming through robotics — Arduino, sensors and motors — and moved into software development and AI. My approach is simple: find a problem, figure out how to solve it, and build something real. Now all-in on **Veya**, an affordable AI eye screening system, and on turning it into a startup.

EDUCATION

Nazarbayev Intellectual School · Kokshetau Expected 2028

PROJECTS

Veya · Founder vey-web-zeta.vercel.app

Affordable AI-powered eye screening system that turns a smartphone into a portable retinal camera.

- Built the prototype: a smart attachment for the phone, a web platform and an AI model
- Trained the model on thousands of retinal images
- Ran customer interviews; goal is early eye-disease screening in rural areas where ophthalmologists are hard to reach

KozbenSal WRO 2026 · 2ND github.com/ulacoder/KozbenSal

Assistive eye-tracking glasses that let people with limited mobility draw, type and control a computer with eye movements and blinks. Built for about \$50 versus \$15,000+ for commercial alternatives.

FMEdU FUTURE MINDS · 1ST github.com/ulacoder/FM-Edu

AI platform for personalized learning for grades 7–12. Won 1st place and 150,000 ₸ at the republican Future Minds Hackathon 2026 with Team Jacket.

Shinobi Motion · Admit Hackathon 2026 shinobi-motion.vercel.app

Browser game where hand signs in front of an ordinary webcam replace the keyboard and mouse. Hand recognition runs fully in the browser.

SaqDrone Autonomous rescue drone that detects a drowning person, navigates to them and deploys help.

Mentoria Hub mentoria-hub-hazel.vercel.app

Scholarships, olympiads and summer programs in one place, with self-paced courses and a Telegram bot.

AWARDS

Future Minds Hackathon — 1st place	2026
WRO — 2nd place	2026
WRO — 3rd place	2025
StartUp Orda by Astana Hub	

EXPERIENCE

Freelance web developer \$700+ earned

Websites for restaurants and local businesses, from first call to launch.

AI agents · independent

Agents for automation and ML models wired into practical tools.

SKILLS

HARDWARE	Arduino, Raspberry Pi, sensors, stepper motors, cameras
AI / VISION	Python, PyTorch, TensorFlow, OpenCV, MediaPipe, Gemini API
WEB	TypeScript, Next.js, React, Tailwind, FastAPI, PostgreSQL
OTHER	Football since age 4
